Stalno kukamo kako smo pre`iveli prethodnu godinu. No, 2004. je bila veoma te{ka, jer je Ministarstvo prosvete naglo prekinulo finansiranje i pored va`eg potpisanoг ugovora te Stanici vi{e nego prepovilo planirana sredstva. Ipak, svи planirani programi su izvedeni. Pouka, istina uo~ena jo{ davnih godina, jeste da se treba ubrzano udaljavati od nestabilne dr`ave (str. 4). Ovaj Godi{njak je ne{to ve}eg obima nego raniji – imalo se o ~emu pisati. ^itaocima preporu-ujemo zanimljive priloge o polazni-kim esejima (str. 16), fotoreporta`u o godi{njoj Konferenciji (str. 20-25), prilog o rezultatima Letnjeg arheolo{kog kampa (str. 26), nastavak rasprave o problemima nau~nog obrazovanja i nau~ne pismenosti (str. 42-47) i na zanimljiv tekstu o savremenim konцепцијama muzeja nauke (str. 48). Verne ~itaoce ne moramo podse}ati na uvek aktuelne “ute strane” sa popularnim li-nim vestima (str. 10-11).

The Petnica almanac is a traditional annual overview of the rich and colorful activities of the Petnica Science Center. Petnica is a unique, alternative, and future-oriented school founded by a group of unsatisfied students and located in the heart of the boiling Balkans to seek out gifted young people and help them adopt critical thinking skills, understand and accept advanced concepts in modern science and technology. Petnica Science Center is a non-government, non-profit institution which continues to exist thanks to the support and of a broad group of alumni, friends, organizations, and corporations from Serbia and abroad.
