

Šta čekate?

Kvalitetan i kontinuiran rad, pa čak i sam opstanak Istraživačke stanice kao samostalne i nezavisne organizacije definitivno zavisi da li će, kako i koliko da se razvije aktivnost Fonda, tj. koliko će se bivši polaznici i saradnici učlaniti u Fond. Tradicija ovakvog tipa fondova raširena je i veoma razvijena u svetu sa tradicijom koja se meri vekovima. Hoćemo li čekati da ti vekovi prvo prođu? Setimo se kako su univerziteti, škole i muzeji u Srbiji formirani i rasli upravo zahvaljujući fondovima i zadužbinama! **Budite kao sav normalan svet – učlanite se odmah u Petnički Fond!**

U Fond se učlanilo dvadesetak fakulteta i instituta. Član Fonda je postala i Srpska Akademija nauka i umetnosti i Privredna komora Srbije. U Fond se učlanio i predsednik države Boris Tadić. Preko dve stotine bivših polaznika ISP uputilo je pristupnice za učlanjenje u Fond. U pripremi je i učlanjenje desetak velikih privrednih preduzeća koji posluju u Srbiji kao i otvaranje posebnog sistema za učlanjenje naših iseljenika. Na žalost, domaća poreska politika još uvek ne stimuliše fondove ovog tipa kojima je jasan cilj podrška obrazovanju i nauci, dakle najdirektnija i najčistija podrška razvoju ovog izmrcvarenog društva. No, preživelićemo i to. Hajde prvo da se učlanimo i da prikupljena sredstva mudro iskoristimo i sačuvamo nešto što vredi!

Postanite i vi član Fonda za razvoj naučnog obrazovanja!

Kontaktirajte Istraživačku stanicu Petnica (014 241 180, ili 241 280) i dobićete sve neophodne informacije.

Sve o Fondu možete naći i na sajtu www.psc.ac.yu/fond

[publishing]

make books, not war!

In spite of all of the economic, social, political, or (a)cultural circumstances, Petnica Science Center continues to publish interesting books. Some of them are instructional, written or edited by professional scientists or by the PSC's teaching staff, and are designed to be used both by students and school teachers.

In the last 24 years we've published over **75 titles** covering a wide spectrum of fields.

Our most popular editions are the annually published "**Students' Collected Works**" which give a selection of what we consider to be the most interesting papers written by secondary-school students attending Petnica at a given year – papers related to their research projects. School teachers often use this edition to find useful ideas and examples of small science projects for their students and to implement them in the regular school curriculum or in various extracurricular activities.

"**Odyssey 2006**" is third edition of a popular handbook and a guide to more than 800 educational and scientific sites on the web. Thanks to the support of Swiss organization SDC, it was printed in 6,000 copies and distributed to hundreds of Serbian schools.

Become a member of Petnica Fund!

Petnica Fund is a kind of alumni fund, created by a group of founders, visiting teachers, and former participants of the Petnica Center in order to help PSC to keep its independence and improve its programs.

Through a spectrum of membership options, you can give a double support to the unique profile and programs of the Petnica Center – a small amount of money that can be used to buy a book or a small piece of equipment, and a new name on a list of supporters.

Today, becoming a member of the Petnica Fund is much more important than when the Fund become big and rich.
